SealedChain Photo Mat v1

Print at 100% ("Actual size", not "Fit to page"). Check: the ruler reads 50 mm, corner codes are 25 mm and the small codes 12 mm wide.

1. Lay the card inside the dashed outline. Keep the codes uncovered.
2. Hold the phone flat above the card (the app shows "Phone level ✓") with soft light from the side, not overhead.
3. The app reads the small codes above and below the card to measure the card in millimetres and records the light's colour balance.

Tip: laminate with MATTE film (not glossy), or print on matte card stock, so the mat itself doesn't reflect.
